- Some injuries from slips and falls on icy surfaces
- Icy patches on some untreated roads, pavements and cycle paths

Further details

Showers will affect the warning area, these falling as a mix of rain and hail near coasts, and sleet and snow inland at times, mainly overnight. This will lead to some temporary snow accumulations at low levels, whilst higher ground of Northern Ireland and Wales in particular, could see a further 2-5 cm of snow.

For most parts of the warning area, however, ice will be the main hazard.
